

MULTI-ZONE HYDRAULIC SEPARATOR - SIM WP 2Z type 1LTT.1HT.YP

Compact solution which allows for connect two or three heating circuits: low-temperature zone (floor heating), high-temperature zone (radiator heating) or optional another high or low-temperature zone by using connection set. Multi-zone Module SIM 2Z works with all TERMET boilers (standard and condensing).

- Mixing (in low-temperature zone) by electric mixing valve
- Pre-installed components: low loss header, thermostatic mixing valve, fittings, controller for working with the boiler
- Esthetic design
- Automatic air-vent

Basic equipment:

- 1 x low loss header for 3 heating circuits
- 1 x thermostatic valve
- 2 x high efficiency circulation pump, pump head up to max. 7 m
- 1 x controller
- 6 x valve 3/4"

parameters

Value

Max water pressure	6 bar
Max CH temperature	95 °C
Pump head at 0 flow	ok. 0,8 bar
Dimensions	600x450x185 mm
Heating water connection	G3/4 inch
